Should we be suspect of these authors and their writings because they refer to creation and the flood? 29 of God's books (at least 23 different authors) refer to creation, the flood, Eden, and the fall, because they had no reason to question Genesis 1-8. They were prophets who spoke for God; God's words. So, which parts of the Bible should we throw out? Change? Add to? Interpret? Who gets to pick? There is unity and interconnectedness because it is all God's word. John 3:39 says the scriptures point to Me, Jesus, the one who gives us eternal life. We don't worship the Bible; we worship the one it reveals. I think it's silly to have to defend God's book. No amount of proof will change minds if hearts are hard. It's like God knew this conflict would happen, and He wrote His book to handle it; He gave us all we need. So, the debate and argument over changing the Bible is not with us, but with God; He wins all debates, eventually.
